The diagram illustrates a system architecture with the following components and connections:

- Broker-Dealer System Programs (402)**: Located in **MEMORY (604)** within a block labeled **800**.
- Broker-Dealer Processor (602)**: Connected to the system programs via a bidirectional arrow **834**.
- Default Market Processor (806)**: Connected to the Broker-Dealer Processor via a bidirectional arrow **830**.
- Default Market System Programs (802)**: Located in **MEMORY (804)** within a block labeled **801**.
- Orders (106)**: Receives input from the Broker-Dealer Processor and sends data to **MEM. SEG. (818)**, **FILE (820)**, **SUB-ROUT. CALL (822)**, **METH. CALL (824)**, and **RPC (826)**.
- MEM. SEG. (818)**: Connected to the Default Market Processor via a bidirectional arrow **816** and a dashed line **814**.
- FILE (820)**: Connected to the Default Market Processor via a dashed line **812**.
- SUB-ROUT. CALL (822)**: Connected to the Default Market Processor via a dashed line **810**.
- METH. CALL (824)**: Connected to the Default Market Processor via a dashed line **808**.
- RPC (826)**: Connected to the Default Market Processor via a dashed line **806**.
- CORBA (828)**: Connected to the Default Market Processor via a dashed line **804**.
- RESPONSES (606)**: Receives data from the Default Market Processor and sends it back to the Broker-Dealer Processor via a dashed line **802**.
